SUMMARY

Fullstack developer with 3+ years expertise in developing and maintaining scalable, responsive web applications. Hands-on experience in Node.js, Express.js, React, Next.js, and PostgreSQL. Demonstrated success in achieving 40% improvement in system performance and boosting user engagement.

WORK EXPERIENCE

Software Engineer , IT Idol Technologies

July 2024 - Present

- Led backend development using Node.js, Express.js, and Next.js building scalable REST APIs optimized for performance and security.
- Built and integrated security systems (JWT, OAuth) for secure user authentication and data privacy.
- Integrated payment gateways into web applications, ensuring smooth transaction flow and enhanced user security.

Associate Software Engineer , IT Idol Technologies

July 2023 - June 2024

- Enhanced system performance by redesigning database schemas and reducing query response times by 40%, improving user experience.
- Implemented Tailwind CSS to enhance and refine responsive UI components for a more consistent and engaging experience across devices.
- Worked on AWS services such as Amplify to enable smooth deployment and hosting of high-traffic web applications.

Freelance Javascript Developer

2022 - 2023

- Developed custom web applications using React.js, HTML/CSS, and ContextAPI for clients, focusing on responsive design and user interaction.
- Delivered high-performance solutions, achieving a 15% increase in page speed and a 20% increase in user retention.
- Worked closely with clients to deliver project on time and exceed user engagement expectations.

EDUCATION

Bachelor of Computer Science, VNSGU

2020 - 2023

Higher Secondary Schooling, RM &VM Desai

2018 - 2020

AREAS OF EXPERTISE

- **Frontend:** React.js, Next.js, Tailwind CSS, HTML5, CSS3, JavaScript.
- **Backend:** Node.js, Express.js, Python, REST API Development.
- **Databases:** PostgreSQL, MySQL, MongoDB
- **State Management:** React Context API, Redux-Toolkit.
- **Authentication:** JWT, OAuth.
- **Version Control:** Git, GitHub.
